可靠的质量保证 Reliable quality assurance

Finio has imported advanced material physical and chemical analysis equipment from Europe and the United States since 2001. It has purchased internationally-esteemed testing machines used for valves, faucets, hoses, durability, fluidity, tempt, tension and burst, metallographic analyzers, 58 sets of complete mechanical & physical testing equipment or checking assembly line, and 26 units of standard machines.

As early as the year of 1994, FINIO had acquired the ISO 9000 serial Certification for Quality Management System and strictly compiled the whole set of process control procedure documents in the process of material procurement, designing, manufacturing, performance testing, and packaging etc. In 2001, the Group not only obtained the ISO 9001 Certification for Quality Management System and the ISO 14001 Certification for Environmental Management System, but also acquired the Australian AS/NZS 3688, AS/NZS 3718, AS 5830.1, and EU's CE Quality Certification with 100% qualification ratio of ex-work products and 100% qualification ratio of export commodity inspection. In 2012, FINIO was acclaimed as the first batch of Demonstration Enterprise for Exports' Safety and Quality by Entry-exit Inspection & Quarantine Bureau of Ningbo City. In October 2010, FINIO's testing center was praised and accredited by China National Accreditation Service for Conformity Assessment, which is affirmation for FINIO's testing capability.

The first class equipments 一流的生产设备

"A handy tool makes a handy man", as it says, the integration management of Industrialization & Informatization, and Intellectualization Equipment can guarantee modern production requirements. Recently, FINIO strived to undertake the technology upgrading, including equipment investment and intelligent unmanned workshops, which preliminarily paved the way for large-scale Intellectualization.

In order to enlarge production, form industrial chains, and promote FINIO, the Modern Industrial Town was inaugurated in 2006. Meanwhile, we had invested a large sum of money in technical upgrading, which replaced old manufacturing equipments and changed into new production models. All these efforts facilitated industrial upgrading and restructuring in order to enhance our competitiveness.
